

7. How to Connect with audio device

You can use these two methods to pair and connect to Bluetooth audio device.

echoII Smart Control Panel

Menu navigation

7-1. Please set the discoverable state on your Bluetooth audio device.

***There should be no other devices that are discoverable around**

7-2. Tap the search icon or go to Menu > Bluetooth audio > Search Bluetooth Speaker > Tap left icon (▶)

***echo II will search for nearby device**

7-3. echoII will be detected by nearby audio device. Once paired, connect to your audio device by tapping connect icon or move to Menu > Bluetooth audio > Connect Bluetooth Speaker > Tap left icon (▶)

⚠ Certain Bluetooth audio devices may not be compatible with the echo II

8. How to Update the Smartpen Software (New Notebooks)

You may be prompted to update the smartpen's software when using a new notebook. If your pen's OLED screen displays :

"Please update your smartpen's software to use this dot paper"

Please connect your pen with one of the Livescribe+ Apps.

Livescribe+ Mobile (Android, iOS)

The Smartpen will automatically download the notebook file you are trying to use.

Livescribe+ Desktop (Windows, Mac)

You can download all the latest notebook file package.
